

WORKERS' COMPENSATION SOLUTIONS

Workers' Comp Telemedicine & Rapid Recovery Network

Immediate injury assessment by telemedicine, followed by expedited referral to occupational orthopedics, physical therapy, and occupational therapy inside a coordinated preferred-provider network.

Same-day

Telemedicine injury evaluation

24-72 hr

Specialist referral when needed

MA & NH

Licensed provider coverage

3,500+

Patients served to date

DESIGNED TO

Reduce time from injury to treatment

Lower workers' comp claim costs

Reduce lost workdays

Improve return-to-work outcomes

Increase employee satisfaction

Serving **Massachusetts & New Hampshire** · Most insurances accepted, including **Workers' Comp** · Self-pay visits from **\$79**

One model that lowers cost for payers and speeds recovery for workers.

Every stakeholder in a workers' compensation claim wins when the first evaluation happens in minutes instead of days, and treatment is coordinated end to end.

For Employers

Lower cost, faster return to work

- ✓ Immediate injury reporting & medical evaluation
- ✓ Reduced workers' compensation costs
- ✓ Faster return-to-work programs
- ✓ Fewer unnecessary ER visits
- ✓ Better injury documentation

For Carriers & TPAs

Predictable, well-managed claims

- ✓ Lower medical spend
- ✓ Reduced claim duration
- ✓ Improved claim predictability
- ✓ Better network utilization
- ✓ Coordinated, documented care pathway

For Injured Workers

Care that starts the same day

- ✓ Same-day medical access
- ✓ Faster specialist appointments
- ✓ Coordinated treatment pathway
- ✓ Improved recovery experience
- ✓ Clear guidance at every step

DOWNSTREAM BENEFITS

- ✓ Lower insurance premiums
- ✓ Reduced legal exposure
- ✓ Improved employee satisfaction
- ✓ Better workplace safety

From injury to recovery, coordinated end to end.

A single, managed pathway, so nothing falls through the cracks between the first call and a safe return to work.

1

Injury is reported

The employee reports the injury by phone to the main office. The call is answered and triaged immediately, then routed to a provider for same-day scheduling. **Mobile reporting is coming soon.**

2

Telemedicine assessment

Within minutes of the scheduled appointment, an occupational-medicine provider evaluates the injury, determines severity, documents claim information, and creates a treatment plan.

3

Care navigation

The provider routes the worker down the right pathway based on injury type.

MINOR

Telemedicine treatment and return-to-work recommendations.

MUSCULOSKELETAL

Expedited orthopedic referral plus PT / OT within the network.

COMPLEX

Specialist management with ongoing case coordination.

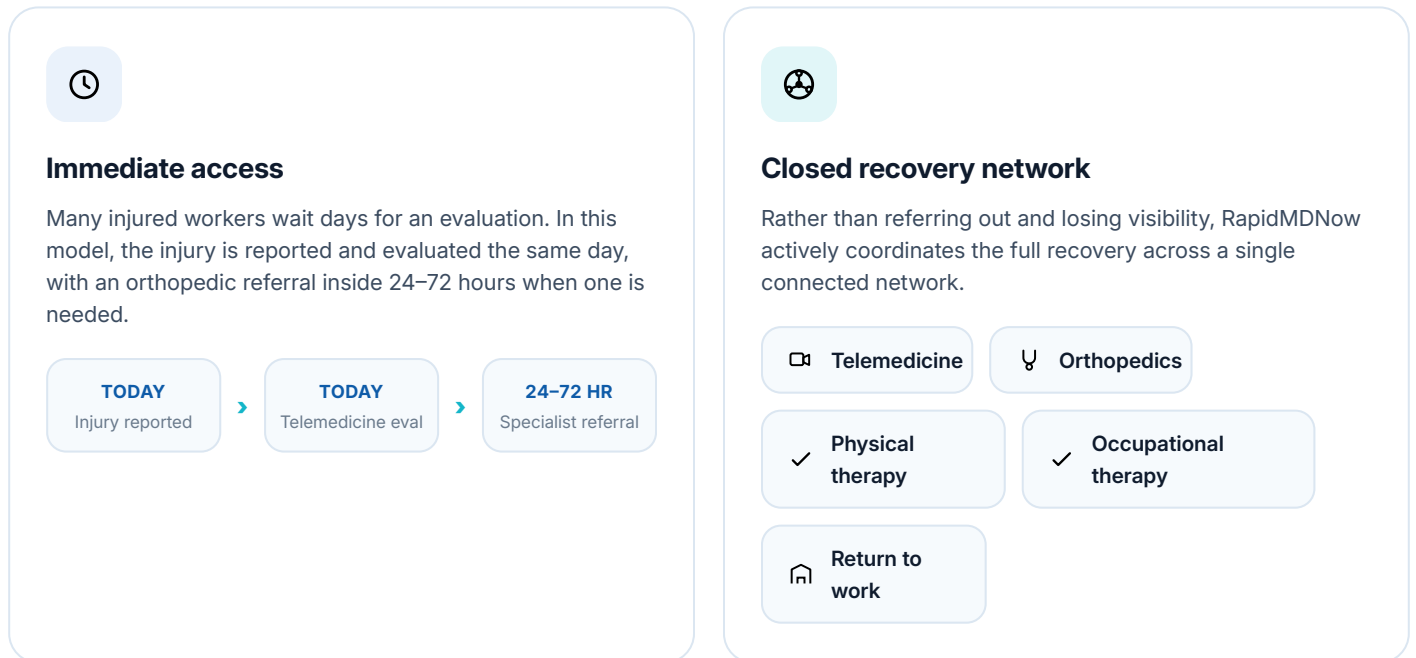

4

Recovery monitoring

Follow-up telemedicine visits, treatment-adherence monitoring, and return-to-work planning, with progress reporting to both the employer and the carrier.

Faster access and a closed recovery network, not just a referral.

Two things set the model apart: care begins the day the injury happens, and the entire recovery is actively coordinated inside one network.

Trusted specialists, ready with priority scheduling.

<p>TM Tufts Medicine HEALTH SYSTEM</p> <p>Preferred health-system partner supporting coordinated specialty care for injured workers.</p>	<p>ATI ATI Physical Therapy PT & REHABILITATION</p> <p>Preferred partner for physical therapy and rehabilitation, with priority scheduling for recovering workers.</p>	<p>CO Coastal Orthopedics ORTHOPEDICS · DANVERS, MA</p> <p>Preferred orthopedic partner providing fast-track specialist consultations and surgical referrals when needed.</p>
